DETAILED ACTION

Applicant's Amendment & Argument

1. The Amendment filed on 11/18/2008 has been entered. The present Office Action is made with all the suggested amendments being fully considered.

The specification has been amended.

Claims 5-38 have been previously cancelled.

Claim 45 has been amended.

No new claim has been added.

Claims 1-4 and 39-54 are pending in this Office Action.

Priority Documents

2. Receipt is acknowledged of English translations of priority documents DE 4435043 A1, DE 19609234 A1 and DE 44 16 597 B4, which are incorporated by reference in the disclosure, as amended on 11/18/2008. The papers have been placed of record in the file.

Incorporation by Reference

3. The previous objection of improper incorporation by reference is now withdrawn.

Objections to the Specification Withdrawn

4. The disclosure having been amended, the previous objection regarding claim 20 is now withdrawn.

Art Unit: 2881

Formal Drawings

5. New drawings were received on 11/18/2008. These drawings are <u>formal</u> figure drawings in replacement of the informal drawings previously received on 7/22/2005.

35 USC § 112 ¶.1 Rejections Withdrawn

6. The previous rejection of claims 1-4 and 39-54 are rejected under 35 U.S.C. 112, first paragraph, is now withdrawn, since English translations of the cited three references, DE 44 35 043 A1, DE 44 16 597 A1 and DE 196 09 234 A1 are found adequate as guidance for a prospective user to make and/or use Applicant's invention.

35 USC § 112 ¶.2 Rejections Withdrawn

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. The previous rejection of claims 1-4 and 39-54 are rejected under 35 U.S.C. 112, second paragraph, is also withdrawn, since English translations of the cited three references, DE 44 35 043 A1, DE 44 16 597 A1 and DE 196 09 234 A1 are found adequate as guidance for a prospective user to make and/or use Applicant's invention.

ALLOWANCE

8. Claim 1-4 and 39-54 are allowed.

The allowed claims are renumbered to claims 1-20 by the Examiner.

Art Unit: 2881

Reasons for Allowance

9. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed for reciting a process of producing particle beam (PB) systems

in which at least one first PB system is formed on a first substrate by PB-induced

deposition, and at least one second PB system is produced on a second substrate by

the first PB system using computer-guided PB-induced deposition, whereupon the

second PB system is further used to produce at least one additional first PB system on

the first substrate by computer-guided PB-induced deposition.

Claim 46 is allowed for reciting a device for the production of PB systems with a

first substrate, where at least one first PB system is produced by computer-guided PB-

induced deposition on the first substrate, characterized in that the first and the second

substrates are arranged at an offset from each other with the free surfaces of one

substrate being opposite to the PB system(s) already present on the other substrate, so

that the PB systems on the one substrate can produce PB systems on the other

substrate.

► Claims 2-4, 39-45 and 47-54 are also allowed for their dependency, either

directly or indirectly, to the allowed claim 1 or claim 46.

Relevant Prior Art

10. This prior art made of record and not relied upon is considered pertinent to

applicant's disclosure:

Art Unit: 2881

▶ USPAT 4,976,843 issued to Ward et al., USPGPub 2001/0055649 issued to

Ogure et al., and USPGPub 2004/0084407 & 2004/0084408, both issued to Makarov et

al. disclose various process of particle beam processing using a first particle beam and

a second particle beam. However, none of them teaches to use the second particle

beam to produce an additional first particle beam.

▶ USPAT 6,039,000, USPAT 6.497,194 and USPAT 7,094,312, all issued to Libby

et al., and USPGPub 2002/0067482 issued to Lanio et al., disclose a method of using

multiple particle beams. However, the method is used for material processing, not for

producing or manufacturing particle beam system(s).

▶ USPGPub 2008/0011718, USPGPub 2005/0072753, USPGPub 2004/0033425,

and USPAT 7,238,294, all issued to the same inventor as the present Applicant (Koop

et al.). However, no Double Patenting issue is here in question, since their claims are

all different from the present invention; specifically regarding first and second particle

beams, wherein the second particle beam is used to produce an additional first particle

beam.

USPGPub 2004/0129351 issued to Iwasaki teaches a computer-guided particle

beam processing for producing 3D structures. However, Iwasaki fails to use the

computer-guided processing to produce a second PB and use the latter to produce an

additional first particle beam.
